Andela Uganda

I write this letter to apply for joining Andela Fellowship this year 2017, I was excited when I found out the opportunity to apply for joining Andela movement.

I am an African, Rwandan. I am passionate to digital technology especially computer technology. I have always willing to use my passion to make changes on our continent of Africa. I have been trying to make change by using technology through co-founding a startup but I have found that I need to join Andela Movement to meet with lifelong learners who strive for mastery of their craft, collaborators, and people with same passion and other many best qualities and values of Andela movement.

Currently I am studying Computer and Software Engineering in University of Rwanda – College of Science and Technology and I decided to stop anytime my application to join Andela movement is considered. My CV is attached detailing my Education background and my every details and other requirements.

I will be pleased to receive your call for an interview and the followings procedure. And it will be exciting to me to join Andela movement and say TIA. Thank you for your time and Consideration.

Sincerely,

MUHOZI Emery
